PROFESSIONAL SUMMARY

Full-stack Software Engineer with hands-on experience building **AI/ML-driven and automation-focused applications** using **React.js, Node.js, Express.js, FastAPI, MongoDB, and PostgreSQL**. Built and shipped a working **OpenAI/LLM-integrated** product (RASEED) end-to-end – OCR extraction, prompt-driven classification, and backend/API design – and integrated the **Google Gemini API** into a civic-tech platform (Pragati Path) for automatic complaint category detection. Presented at Agentic AI Hackathon 2025. Comfortable owning a feature from architecture to deployment, with a strong foundation in **data structures, algorithms, and REST API design**, and an active interest in **Generative AI, LLM-based automation, and agentic workflows**.

TECHNICAL SKILLS

Programming : Java, JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3

AI/ML & Automation : OpenAI API Integration, Google Gemini API Integration, OCR-based Data Extraction, LLM-driven Classification, Prompt Engineering (Basics), Agentic AI Workflows

Frontend : React.js, Next.js, Redux Toolkit, Context API, React Router, React Hooks, Vite, Tailwind CSS, Responsive Web Design

Backend & APIs : Node.js, Express.js, FastAPI, REST APIs, API Integration

Databases : MongoDB, PostgreSQL, DBMS, RDBMS, NoSQL

Core CS : Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks

DevOps & Cloud : Git, GitHub, Docker, AWS (Basics), Vercel, Netlify

Tools & Testing : Postman, npm, Webpack, VS Code, Jest (Basics), Unit Testing

EXPERIENCE

Appversal

React Developer

Mar 2026 – Present

Hybrid

- Developed and maintained scalable web applications using **React.js, TypeScript, JavaScript (ES6+), and Vite**.
- Built reusable, modular UI components using **React Hooks, Context API, and Redux Toolkit**, improving code reusability and maintainability.
- Integrated RESTful APIs using Axios, implemented asynchronous data fetching with `async/await`, and handled loading, caching, and error states.
- Converted Figma designs into responsive, cross-browser interfaces using **Tailwind CSS and Material UI** while ensuring accessibility and consistent UX.
- Optimized application performance through component memoization, lazy loading, and efficient state management.
- Collaborated with backend engineers, designers, and QA in Agile sprints, participated in code reviews, Git workflows, and feature releases.

Appversal

React Developer Intern

Sep 2025 – Feb 2026

Hybrid

- Developed responsive user interfaces using **React.js, JavaScript, HTML5, and CSS3**.
- Implemented reusable React components, React Router navigation, and Context API to improve application scalability.
- Integrated REST APIs using Axios and Fetch API, implementing validation, loading indicators, and API error handling.
- Worked with senior developers to debug UI issues and deliver new features following **Agile** practices.
- Used **Git and GitHub** for version control, pull requests, and collaborative development.

PROJECTS

RASEED — AI-Powered Receipt & Expense Analysis Platform

React.js, FastAPI, PostgreSQL, OpenAI API, OCR

- Built an end-to-end **AI/automation system** converting unstructured receipt images into structured, categorized financial data using **OCR extraction combined with OpenAI LLM-based classification**.
- Personally owned [specify your part – e.g. “the OCR-to-LLM data pipeline and PostgreSQL schema”], solving the core technical challenge of [specify – e.g. “handling inconsistent OCR output and prompt-tuning the LLM to reliably classify expenses across varied receipt formats”].
- Designed the **PostgreSQL** schema for scalable expense/receipt storage and built **FastAPI** backend services exposing REST endpoints for upload, categorization, and real-time analytics.
- Developed responsive React.js dashboards for receipt management and financial visualization, integrated via Axios.
- Presented at **Agentic AI Hackathon 2025**, demonstrating a working, deployed implementation of AI-driven financial automation.
- Live demo: [add link] | GitHub: [add repo link]

Pragati Path — AI-Powered Civic Engagement & Complaint Automation Platform

React.js, TypeScript, Redux Toolkit, Node.js, Express.js, MongoDB, Gemini API

- Designed and built a full-stack civic-tech platform that automates citizen complaint intake, **AI-based category classification**, routing, and status tracking, replacing manual reporting workflows with a structured digital pipeline.
- Integrated the **Google Gemini API** to automatically analyze incoming complaint text and **auto-detect the correct category**, removing the need for manual tagging and reducing misrouted complaints.

- Personally owned [specify your part – e.g. “the Gemini-based classification pipeline and complaint routing logic”], solving the technical challenge of [specify – e.g. “prompt-engineering Gemini to reliably map free-text complaints to a fixed category set and handling low-confidence/ambiguous cases”].
- Built citizen dashboards and dynamic, validated forms in **React.js/TypeScript with Redux Toolkit** for predictable state management across devices.
- Developed backend REST APIs in **Node.js/Express.js with MongoDB** for complaint registration, category storage, tracking, and status management, with centralized error handling.
- Live demo: [add link] | GitHub: [add repo link]

MehndiMuse — Full-Stack Artist Booking Platform

React.js, Tailwind CSS, Node.js, Express.js, MongoDB

- Built a full-stack artist booking platform with **React.js and Tailwind CSS** featuring responsive UI and reusable components.
- Developed customer booking workflows, artist dashboards, and appointment management with REST API integration using Axios.
- Implemented secure authentication, form validation, and booking management to improve overall UX.
- Designed scalable backend services using **Express.js and MongoDB** and automated booking assignments via Google Sheets API.

Freelance Web Development

React.js, Next.js, Tailwind CSS, Node.js

- Designed, developed, and deployed responsive business websites for multiple clients, including Sikar Mehndi, Gurugram Mehndi, BhaiLog, Akshay Argade, and MehndiMuse.
- Built SEO-friendly, mobile-responsive interfaces with reusable React components, API integrations, and production deployment.

ACHIEVEMENTS

- Solved **250+** Data Structures and Algorithms problems on LeetCode, strengthening problem-solving and algorithmic thinking.
- **Finalist – Agentic AI Day 2025** (Hack2Skill & Google Cloud)
- Qualified for Internal **Smart India Hackathon (SIH) 2024**.
- Participated in Dev-On, HackWithDelhi, and HackJNU 3.0 Hackathons.
- **SAP Certified Associate – Back-End Developer (ABAP Cloud)**

EDUCATION

GL Bajaj Institute of Technology and Management
B.Tech in Computer Science (Data Science) – 80%
